

AMR ADEL SAYED

SOFTWARE ENGINEER | .NET FULL STACK DEVELOPER | KIOSK & ATM SYSTEMS

+20 01148164929 | amr.adel20@outlook.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Giza, Egypt

PROFESSIONAL SUMMARY

.NET Full Stack Developer with 5+ years of combined experience (3 years hands-on training + 2+ years post-graduation). Specialized in building ERP systems, enterprise web applications, and production-grade Kiosk & ATM software. Experienced with ASP.NET Core, Angular, SQL Server, and Oracle. Proven track record delivering real-world systems for banking, healthcare, manufacturing, and education sectors across Egypt and the Gulf. Strong Agile team player with expertise in debugging, testing, and delivering scalable solutions.

TECHNICAL SKILLS

Front-End: Angular (v20), Angular Material, PrimeNG, TypeScript, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind CSS

Back-End: C#, ASP.NET Core, ASP.NET MVC, Web API, Entity Framework, LINQ, Repository Pattern, Unit of Work, CQRS, OOP

Database: SQL Server, Oracle (TOAD)

Hardware Integration: Kiosk Systems, ATM Software, Printers, POS, Cameras, Motors — Production Environments

AI & Automation: N8N Workflows, AI Automation, Process Optimization

Testing & Tools: Manual Testing, Debugging, Postman, Swagger, Git, GitHub, TFS, Agile/Scrum

PROFESSIONAL EXPERIENCE

Finway Tech

Dec 2025 – Present

.NET Full Stack Developer | *Cairo, Egypt · Hybrid*

- Building production-grade Kiosk and ATM software deployed in real banking and commercial environments.
- Developed Master Gold Kiosk — a gold and bullion vending system with full hardware integration (printers, POS, cameras, motors).
- Built donation Kiosk software for 57357 Children's Cancer Hospital enabling seamless self-service donations.
- Developing ATM software for Banque du Caire (BDC) integrated with banking infrastructure.
- Contributed to ERP systems development alongside Kiosk software projects.

DMS — Data Management Systems

Jan 2025 – Dec 2025

Software Engineer | .NET Full Stack Developer | *Cairo, Egypt · Hybrid*

- Developed and enhanced ERP production modules (Production Setup, Orders, Maintenance, Customer Orders, Production Planning) serving large-scale factories across Egypt and the Gulf.
- Built and customized Angular Material and PrimeNG components adapting to client-specific requirements and ensuring responsive, user-friendly interfaces.
- Integrated Angular components with .NET Core Web API using Repository, Unit of Work, and CQRS patterns enabling full CRUD operations.
- Designed and optimized professional reports with Oracle (TOAD), improving accuracy and performance.
- Implemented role-based UI authorization and collaborated in Agile team across development, debugging, and testing.

Skills Suad Kafafi International School

Oct 2024 – Jan 2025

Junior .NET Full Stack Developer (Contract) | *Cairo, Egypt · On-site*

- Designed and implemented the school's official website UI ensuring responsive layouts using HTML, CSS, Bootstrap, and JavaScript.
- Utilized ASP.NET MVC for backend development ensuring seamless and scalable user experience.

- Collaborated with the administrative team to deliver a modern and accessible online presence.

Giza Power Industry

Jan 2021 – Oct 2024

.NET Full Stack Developer (Training → Full Role) | Cairo, Egypt

- Started as a trainee during university and progressed to a full developer role — gaining 4 years of hands-on ERP experience in cable manufacturing.
- Worked on and enhanced an ERP system including modules for production lifecycle, warehouse management, and maintenance.
- Built and maintained modules integrated with the HR system for employee and administrative processes.
- Supported migration of the ERP system to a web-based platform using ASP.NET MVC Core improving scalability and accessibility.

PROJECTS

ATM Software — Banque du Caire (Finway Tech)

Production ATM kiosk software integrated with banking infrastructure and hardware peripherals including printers, cameras, and POS systems.

Master Gold Kiosk (Finway Tech)

Gold and bullion vending kiosk system with full hardware integration — POS, printers, cameras, and motors.

57357 Donation Kiosk (Finway Tech)

Self-service donation kiosk for Egypt's leading children's cancer hospital enabling seamless donations.

Mohandsen Project (Freelance)

Web application for managing construction tools and customer orders. Built using Angular, ASP.NET Core, and SQL Server with secure login/registration.

Tashtip — Graduation Project (Grade: A)

Online platform for finishing and renovation services with 3D/2D/VR design previews, pricing, and order management system.

EDUCATION

Modern Academy Maadi

Jan 2024

Bachelor of Management Information Systems | Grade: B+ | Graduation Project: **Grade A**

CERTIFICATIONS & TRAINING

Brand Building Crash Course — Plug and Play — Amir Mohy Aldine, May 2026

Personal branding, market positioning, brand communication, and value proposition.

Front-End Development Diploma — Route IT Training Center, Sep 2025

HTML, CSS, JavaScript, Bootstrap, TypeScript, Angular, Tailwind CSS. Multiple projects focusing on responsive UIs and API integration.

Training Certificate — Giza Power Industry, 2021–2024

3-year practical training program in ERP development, SQL Server, and .NET technologies.

C++ Programming Certificate — YAT Academy

Fundamentals of programming, object-oriented concepts, and problem-solving using C++.
